

一、用户登入

1.登入获取accessToken

请求地址: /api/login?username=admin&password=123456

The screenshot shows a REST client interface with a GET request to `http://localhost:8080/api/login?username=admin&password=123456`. The response is a JSON object with the following structure:

```
1 {
2   "result": "1",
3   "msg": "数据操作成功",
4   "datas": null,
5   "data": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJhdWQiOiJBUFAiLCJ1c2VyX2lkIjoiaVTE0MTc3MDA5OTE1NTFwMzI4NyIsIm1zcyI6IiN1cnZpY2UiLCJleHAiOjE1NTM2MDU3MjgsIm1hdCI6MTU1Mjc0MTcyOH0.1gqoK0RMZZ3S-WNE92Juy2NtrQ_fIu2NZiTz9V0xA4",
6   "totalPage": 0,
7   "totalNum": 0,
8   "perPageSize": 15,
9   "size": 0
10 }
```

A red box highlights the `data` field, and a red arrow labeled "copy" points to it.

2.调用接口, 请求头中携带accessToken

The screenshot shows a REST client interface with a GET request to `http://localhost:8080/api/process/hasTodoJson?operators=U141770099155103287`. The request headers are configured with an `accessToken` field. The response is a JSON object with the following structure:

```
1 {
2   "result": "1",
3   "msg": "数据操作成功",
4   "datas": [
5     {
6       "id": "U155274189690882829",
7       "name": "区局开单",
8       "datas": [
9         {
10          "id": null,
11          "processId": "9dc8c222d05f4e1ea5196e3e5cbc7c28",
12          "orderId": "68322b0d2420490b9d57295a4507422c",
13          "taskId": "b1f014d4fba40598314651379394848",
14          "processName": "区局开单",
15          "orderTitle": "区局开单(超级管理员)",
16          ...
17        }
18      ]
19     }
20   ]
21 }
```

A red box highlights the `accessToken` field in the headers, and a red arrow labeled "paste" points to it.

二、模块

1. 领取任务接口（没用）

请求地址：/api/process/takeTask

（因该就是设置可领取）

2. 获取流转信息接口

请求地址：/api/process/processHandleInfo?orderId=0c442e82026141c9a2c91c7bb51951c6

3. 获取菜单的接口

请求地址：/api/role/viewMenus

返回结果：

```
{
  "result": "1",
  "msg": "数据操作成功",
  "datas": [
    {
      "id": "M_U155168469200873464",
      "pId": "0",
      "isParent": false,
      "name": "消息报送",
      "flag": "menu",
      "icon": null,
      "iconSkin": null,
      "open": true,
      "checked": false,
      "nocheck": false,
      "doCheck": false,
      "checkFlag": null
    },
    {
      "id": "M_U155168470129207044",
      "pId": "M_U155168469200873464",
      "isParent": false,
      "name": "消息登记",
      "flag": "menu",
      "icon": null,
      "iconSkin": null,
      "open": true,
      "checked": false,
      "nocheck": false,
      "doCheck": false,
    }
  ]
}
```

```
        "checkFlag": null
    },
    {
        "id": "M_U155168471425813125",
        "pId": "M_U155168469200873464",
        "isParent": false,
        "name": "消息列表",
        "flag": "menu",
        "icon": null,
        "iconSkin": null,
        "open": true,
        "checked": false,
        "nocheck": false,
        "doCheck": false,
        "checkFlag": null
    },
    ...
],
"data": null,
"totalPage": 0,
"totalNum": 49,
"perPageSize": 15,
"size": 0
}
```

4.获取下拉框数据接口

说明：获取下拉框数据（id值详情查看川谷总结的那张表）

请求地址：/dict/itemById/id值

GET

localhost:8080/api/dict/itemByld/D_U155185790225816940

返回数据:

```
{
  "result": "1",
  "msg": "数据操作成功",
  "datas": [
    [
      "1LV_ROAD",
      "一级道路",
      "1"
    ],
    [
      "2LV_ROAD",
      "二级道理",
      "2"
    ],
    [
      "3LV_ROAD",
      "三级道路",
      "3"
    ],
    [
      "4LV_ROAD",
      "4级道路",
      "4"
    ],
    [
      "OTHER",
      "其他",
      "5"
    ]
  ]
}
```

```
        "5"  
    ]  
  ],  
  "data": null,  
  "totalPage": 0,  
  "totalNum": 5,  
  "perPageSize": 15,  
  "size": 5  
}
```

返回参数说明：

参数	解释	备注
datas[0]	代码编号	
datas[1]	名称	
datas[2]	排序字段
